

Predicting Long-Term Cardiovascular Risk in Hypertensive Patients

A Continuing Professional Development (CPD) Initiative

 Ajmer, Rajasthan

 17th-19th April 2026

Welcome Letter

Dear Doctor,

Warm greetings from CPD Gurukul.

We are pleased to welcome you to our upcoming Continuing Professional Development (CPD) program titled **“Predicting Long-Term Cardiovascular Risk in Hypertensive Patients,”** scheduled from **17th to 19th April 2026 at Ajmer, Rajasthan,** with the **scientific session on 17th April 2026.**

Hypertension remains a major driver of cardiovascular morbidity and mortality. While routine blood pressure control is essential, long-term cardiovascular outcomes depend on early identification of overall cardiovascular risk and timely, evidence-based treatment decisions. This CPD program has been designed to bridge the gap between conventional BP-centric management and comprehensive cardiovascular risk assessment.

The program brings together consulting physicians and specialists to explore validated screening tools, clinical markers, and treatment strategies that help predict and reduce long-term cardiovascular risk in hypertensive patients. The discussions are firmly grounded in real-world practice and aligned with contemporary clinical guidelines.

By combining scientific depth with practical clinical relevance, this CPD initiative aims to ensure that every participant gains clear, actionable insights that can be applied immediately in everyday clinical practice.

What Sets This CPD Program Apart

- Real-world, practice-oriented discussions
- Structured approach to cardiovascular risk prediction
- Interactive, case-based learning
- Focus on outcomes beyond BP numbers

We look forward to your active participation and to meaningful peer-to-peer learning during this academic engagement.

Warm regards,

Dr. Sunil Pandey

Director – Medical Affairs

CPD Gurukul

Why Attend?

- Gain practical clarity on long-term cardiovascular risk beyond BP numbers in hypertensive patients.
- Understand screening tools and clinical markers used to identify high-risk hypertensive phenotypes.
- Learn how to align treatment intensity with overall cardiovascular risk rather than isolated readings.
- Participate in case-based discussions reflecting real-world decision-making challenges.
- Strengthen confidence in early intervention strategies to reduce future cardiovascular events.

Academic Highlights

- Understanding why BP readings alone underestimate long-term cardiovascular risk
- Identifying high-risk hypertensive phenotypes using clinical and investigational markers
- Applying structured cardiovascular risk prediction tools in routine practice
- Aligning treatment intensity with overall cardiovascular risk
- Translating risk stratification into treatment decisions through case-based discussions

Agenda

Time	Session
7:00 – 7:10 PM	Welcome Note & Program Overview
7:10 – 7:40 PM	Predicting Long-Term CV Risk in Hypertensive Patients: Screening Methods and Treatment Options
7:40 – 8:10 PM	Case-Based Panel Discussion: Translating Risk Stratification into Treatment Decisions
8:10 – 8:30 PM	Open Forum: Q&A and Peer Dialogue

CPD Significance

This Continuing Professional Development (CPD) program focuses on improving cardiovascular outcomes in hypertensive patients through early risk identification and evidence-based treatment strategies.

Key Significance Points

- **Clinical Relevance:** Addresses the real-world challenge of identifying high-risk hypertensive patients early in routine practice.
- **Therapeutic Insight:** Clarifies treatment decisions based on overall cardiovascular risk, not BP values alone.
- **Peer Learning:** Encourages meaningful exchange through case-based panels and shared clinical experiences.
- **Clinical Confidence:** Supports guideline-aligned, outcome-focused hypertension management.

Limited Seats – Book Early!

Registrations will be accepted on a **first-come, first-served basis**. Early registration ensures accommodation and participation privileges for the CPD program scheduled from **17th to 19th April 2026 at Ajmer, Rajasthan, with the scientific session on 17th April 2026**.

Registration Fees		
Category	Up to 1 th April, 2026	Spot
Delegate	INR 7,500 inclusive of GST	INR 10,000 inclusive of GST
Student	INR 5,000 inclusive of GST	INR 7,000 inclusive of GST

Registration Includes

- Full CPD program access
- Participation in all scientific sessions and discussions
- Case-based learning with real-world clinical insights
- Peer interaction with consulting physicians and specialists

Come for the learning. Stay for the clinical clarity.

About CPD Gurukul

CPD Gurukul is a dedicated educational platform committed to advancing **Continuing Professional Development (CPD)** for healthcare professionals across India.

By integrating **evidence-based clinical learning** with skill-building in leadership, communication, and practice improvement, CPD Gurukul supports doctors in strengthening both medical expertise and overall professional competence required in today's evolving clinical environment.

Our Initiatives Include

- CME and CPD programs focused on real-world clinical relevance
- Expert faculty engagement and advisory-driven content
- Knowledge-sharing forums encouraging peer learning
- Academic collaborations with hospitals and medical associations

Each CPD activity is designed to improve patient care, reinforce physician identity, and elevate standards of clinical excellence.

CPD Gurukul is more than a platform.

It is a **commitment to developing doctors who lead, influence, and innovate responsibly.**
